Products for Eczema and Sensitive Skin

## Puraderm Laundry

Puraderm's liquid laundry detergent works by rinsing completely residue free. Residue free exceeds all other detergent formulas by totally eliminating chemical exposure. Since the product actually rises away completely, no chemicals are left to cause irritation to sensitive skin. By having less exposure to irritants we can form a lifestyle that works for us and our skin.

Puraderm never requires a fabric softener because it leaves nothing to stiffen fabrics. Puraderm Laundry is rated for use in both HE and standard washing machines.

## Puraderm Hair and Body

Puraderm's hair and body soap is a blend of gentle surfactants that work together to lift dirt and oils without leaving any trace of the original product after rinsing.

With this soap you can determine how much natural oil is left on your skin by the amount used. Puraderm can help prevent irritation from chemical exposure as well as drying from excessively removing natural oils.

Puraderm Hair and Body will never "build up" and because of this you will always have consistent results which will help to form a routine that works for you.

## Puraderm Skin Sealing Wax

Puraderm's beeswax base skin cream was designed to help protect skin and hold in moisture after washing. By using just a small amount of wax after washing, you can retain the feeling of soft "just washed" skin.

Puraderm wax can help retain natural moisture during the cold dry months of winter that cause splitting and cracking. If used before work or outdoor activity it can help protect skin and make any clean up easier and less irritating.

Our wax is made with only the necessary ingredients and no added fragrance.

#### Puraderm Sun Safe

Puraderm Sun Safe clothing treatment turns regular clothes into sun protection fabrics. This type of protection is ideal for individuals with sensitive skin that cannot use sunscreen due to chemical sensitivity. Treat all of your favorite shirts for golf, gardening, fishing and sailing. Puraderm Sun Safe has been lab tested\* and is capable of greatly reducing exposure to covered skin from all types of UV rays. Puraderm Sun Safe is a practical and affordable alternative to sun protective clothing.

\*Tested by International UV Testing Laboratories, Auburn, AL in accordance with test method AATCC183. Please see web site for more information.

#### Puraderm Sample Pack

The Puraderm Sample Pack is our offer to give everyone with eczema or sensitive skin the opportunity to try our products. We are confident that our samples can be the link to starting a relationship with each of our customers. We are not your typical eczema product; we understand that lifestyle becomes your treatment and prevention can form a path to success.

Each sample includes:

- 4 Ounces of Puraderm Laundry
- 4 Ounces of Puraderm Hair and Body
- ½ Ounce of Puraderm Skin Sealing Wax
